Apple launches AirPods 5, Watch Series 12 and Watch Ultra 4

This marked a reduction in the number of accessory devices when compared to previous years

At this year's 'Surprise and Shine' edition of Apple's annual Autumn event, CEO John Ternus unveiled the company's newest accessory devices: the Apple AirPods 5, the Apple Watch Series 12, and the Apple Watch Ultra 4.

This marked a reduction in the number of accessory devices when compared to previous years, but still covers Apple's main wireless earbuds categories and its two

smartwatch variants.
